Idaho Could Teach Wolves How to Kill

Sixty percent of wolves in an Idaho wilderness area would be slaughtered under yet another state plan to keep elk for hunters to kill. Earthjustice—which stopped a similar wolf killing in January—is back in court to halt this latest scheme.

Trip's Column

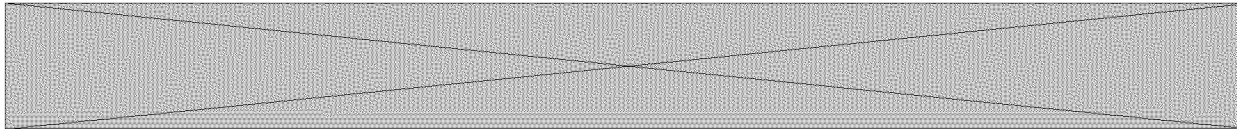

America's Rooftop Fight for Energy Independence

America's rooftops are the latest battleground over clean energy, as the fossil fuel industry seeks to

quash the growth of solar energy. It's our energy ^{Nationwide} independence vs their bottom line, says Earthjustice President Trip Van Noppen.

From the Arctic seas to the farmlands of the lower 48, Earthjustice work made strong advances in the last month:

Shell Oil abandons plans to drill this summer in America's Arctic Ocean.

The EPA finally sets a date this year for rules regulating poisonous coal ash.

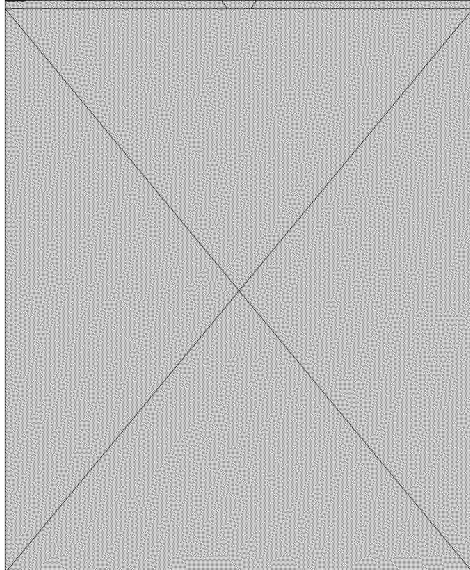

Obsolete standards for protecting farmworkers from pesticides will be revised.

A court decree may ultimately quell toxic pollution from oil refineries.

In The News

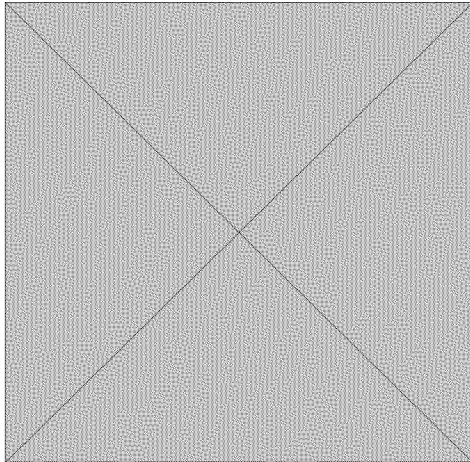

W. Va. River Flooded with Chemicals

The nation's primary law to protect us from dangerous chemicals was too weak to save citizens of W. Virginia from a mystery chemical spill that sickened hundreds of people and poisoned drinking water for 300,000. The story of the spill—and why it could happen again—is presented in photos and words.

Powerful Opportunity to Stop the Pebble Mine

If approved, Pebble would be the largest, most destructive open-pit mine in North America. The EPA recently concluded that this mega-mine would have significant, potentially "catastrophic" impacts on the region's incomparable salmon and wildlife.
